Delay in State Processing of FY 13/14 Medi-Cal Claims

The Los Angeles County - Department of Mental Health (LAC-DMH) has been notified that the State's Short-Doyle/Medi-Cal II system is undergoing maintenance to allow processing of claims with service dates of July 1, 2013 and forward. Specifically, the State has instructed LAC-DMH to refrain from submitting claims for service dates July 1, 2013 and forward until further notice. The State will continue to accept claims with service dates prior to and including June 30, 2013.

Please be aware that the State's maintenance has no impact on payment for claims submitted to the Integrated System (IS) via Direct Data Entry (DDE) or Electronic Data Interchange (EDI). All claims accepted in the IS, regardless of service date, will be paid through the Certified Public Expenditure (CPE) process as normal.

LAC-DMH will hold Medi-Cal claims with service dates from July 1, 2013 and forward, which will result in providers seeing their claims in forwarded status until the State advises us that they can accept the claims. Once LAC-DMH is notified that the State maintenance is complete, the claims will be released and processed as normal.
